SYPHON

With its entirely sealed off process, no aroma can escape in Siphon. The perfect water temperature allows for the extraction of oils and rich flavors, giving the coffee intense flavors and great body without chewy sediment.

· TORAJA	· MANDAILING	· ACEH GAYO	8 OZ
· PAPUA	· BALI		30

COLD DRIP

Originating in Japan, this is a slow extraction method, using cold water instead of hot, which produces a flavorful concentrated coffee much less acidic and naturally sweeter than regular brewed coffee.
